DETAILED ACTION

Specification

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

2. The abstract of the disclosure is objected to because the abstract is too long. The abstract should be between 50 and 150 words. Also, the abstract should commence on a separate sheet of paper separate from any other text of the application including the title. Correction is required.

See MPEP § 608.01(b).

EXAMINER'S AMENDMENT

3. Authorization for this examiner's amendment was given in a telephone interview with Attorney Joanna Chiu on Friday, September 2, 2005.
4. The application has been amended as follows: Please omit "comprising" from the second line of amended claim 11.

Allowable Subject Matter

5. The following is an examiner's statement of reasons for allowance: Prior art does not disclose a method or apparatus that determines in advance which branch metrics become zero and thus uses a lower complexity butterfly unit.

Art Unit: 2631
